Vericare

A Smart Care platform enabling seniors to age safely in the comfort of their homes.

Vericare:

Enabling seniors to age independently, and offering caregivers peace of mind.

Why Vericare?

- 80% of seniors surveyed would like to age safely in the comfort of their homes.

- The demands and pressure on family and professional caregivers are expected to worsen as the boomers age.

- Healthy aging is dependent on early detection and prevention of illness.

How can Vericare help?

- Extending the ability of seniors to live independently by ensuring their safety is everyone's main focus.

- Offering caregivers and peace of mind by enabling them to be connected and informed of their love one's wellbeing and safety at any time.

- Reducing cost of senior and medical care through prevention and early detection of potential safety and health risks.

How It Works

Discrete passive sensors track and monitor *Activities of Daily Living* (ADL) in real time.

Using proprietary algorithms and pattern recognition technology of the ADL data, Vericare will notify family members and caregivers of potential safety or health concerns through text-based alerts.

What Users Say

I would like the information from Vericare to go to my doctor. It will give him more information to help treat me.

Vericare User

Vericare makes me feel more connected to my dad. I feel assured when I don't have the time to be with him always.

Family Caregiver

I am beyond thrilled. The system informed the staff when I did not get out of bed during my regular time and they checked on me.
